

Full Stack Web Developer

1. List 3 things that you know about a Full Stack Web Developer

-
-
-

2. In Xampp, the following file structure exists:

htdocs

cat.png
animals.html
meow.mp3
zooTrip.mp4

What would you type into your browser address bar to request animals.html?

Go

3. How do we know when we are looking at a php variable?

Go

4. What is the purpose of the following line of php?

PHP

```
while($row = $result->fetch_assoc())
```

-

5. The table that was produced in the video does not contain any table headers eg it should look like this:

City	Cuisine Type	Order Value	Delivery Time (mins)
Delhi	Fast Food	\$608.79	15
Ahmedabad	Bakery	\$122.08	15
Ahmedabad	Fast Food	\$1105.73	15
Kolkata	Fast Food	\$270.76	15
Pune	Fast Food	\$200.74	16
Hyderabad	Bakery	\$466.85	16
Bengaluru	North Indian	\$750.40	16
Kolkata	Fast Food	\$786.56	16
Hyderabad	Mexican	\$804.96	16
Hyderabad	Healthy	\$1094.57	17

Do some research on html table headers and see if you can include them in your design (w3schools is a good resource).

You can also research how to apply css to your table and beautify it eg in the table above:

- there are borders
- data is centre-aligned
- there is some padding in the data cells to help the information stand out
