

FOCUS 2 - TEXT TAGS

When we want to put text onto a webpage we use Text Tags.

Here are some common Text Tags:

HTML Tags	Result
<code><h1>Hello</h1></code>	Hello
<code><h2>Hello</h2></code>	Hello
<code><h3>Hello</h3></code>	Hello
<code><p>Hello</p></code>	Hello
<code><p><i>Hello</i></p></code>	<i>Hello</i>
<code><p><u>Hello</u></p></code>	<u>Hello</u>

As you can see, Text Tags come in pairs.

Look at these sentences which are displayed on a webpage.

The Cat

By Jack Jones

One day a big cat was walking down the street.

It saw a mouse.

It chased the mouse and *ate* it!

The end.

TASK

Rewrite the story using HTML text tags:

HTML
